EDUCATION

B.Tech – CSE

GLA University, Mathura
2023 – 2027

Sr. Secondary (BSEB)

73.80% · 2023

LANGUAGES

- C++ · Java · Python
- JavaScript · TypeScript

FRONTEND

- React.js · Next.js 15
- Tailwind · Framer Motion
- HTML5 · CSS3

BACKEND & DB

- Node.js · Express · Flask
- REST APIs · WebSockets
- MongoDB · SQL

DEVOPS & ML

- Docker · Kubernetes
- CI/CD · Git · GitHub
- PyTorch · PyAutoGUI

CERTIFICATIONS

- Agile Methodology
- Master of Project Academy
- Generative AI Fundamentals
- Microsoft Learn

Professional Summary

CS undergraduate (GLA University, 2027) building real-time platforms, AI/ML-powered tools, and creative web experiences. Fluent across the full stack — React/Next.js frontends, Node.js/Flask backends, PyTorch inference, and Docker/Kubernetes deployments. Passionate about shipping production-quality software that solves real-world problems.

Projects

CodeArena — Multiplayer Coding Battle Platform [\[Live Demo\]](#)

Stack: React · Node.js · Express · WebSockets · MongoDB

- ▶ Architected a real-time battle platform supporting 10+ concurrent users with sub-100ms latency via WebSockets
- ▶ Room creation/joining with unique codes and live leaderboard that updates instantly on every solution submission
- ▶ Practice question library for skill-building; scalable Node.js/Express backend with MongoDB for score persistence
- ▶ Optimized WebSocket event handling to support multiple simultaneous rooms without performance degradation

DEEPSEEK-AI — AI-Powered Media Verification Tool [\[GitHub\]](#)

Stack: Python · Flask · PyTorch · Chrome Extension API

- ▶ Chrome Extension with a floating 1-click screenshot button for instant detection of AI-generated images, deepfake audio, and fake news
- ▶ PyTorch deep learning models for image authenticity classification and audio deepfake detection with real-time inference
- ▶ Flask REST API serves ML predictions to the extension; full pipeline from browser capture to model verdict in seconds
- ▶ End-to-end architecture: browser extension → REST API → PyTorch inference → result displayed in-browser

AryanOS — OS-Themed Interactive Developer Portfolio [\[GitHub\]](#)

Stack: Next.js 15 · TypeScript · Framer Motion · Zustand · Tailwind CSS · React-Rnd

- ▶ Creative OS-style portfolio with boot sequence animation, application dock, taskbar, and draggable/resizable window management
- ▶ Interactive built-in apps including File Explorer, Terminal emulator, and a playable Snake Game as in-browser windows
- ▶ Zustand for global OS state (open windows, active app); Framer Motion for smooth open/close/minimize animation
- ▶ Uploadable custom wallpapers, fully responsive layout; deployed on Vercel using Next.js 15 App Router

EXWHYZED-TyperPro — Smart Auto-Typing Desktop App [\[GitHub\]](#)

Stack: Python · PyAutoGUI · Tkinter

- ▶ Cross-platform desktop auto-typing tool using PyAutoGUI; enables cross-device use via AnyDesk/TeamViewer
- ▶ Configurable typing speed and delay controls; clean Tkinter UI accessible to non-technical users with zero learning curve
- ▶ Reliably handles any pasted content through robust GUI automation, supporting a wide range of use cases

Training & Experience

DevOps Intern — JOVAC Technical Guftgu, GLA University

Jun–Jul 2026

- ▶ Implemented CI/CD pipelines using Git/GitHub; deployed Dockerized applications on Kubernetes clusters
- ▶ Built and tested REST APIs; integrated frontend with backend services in a collaborative team environment
- ▶ Gained hands-on experience with container orchestration, deployment monitoring, and production troubleshooting
