

Aryan Kumar Sharma

Mathura, India

sharmaaryankumar7@gmail.com — +91 7903721185

GitHub — LinkedIn — LeetCode

Professional Summary

Computer Science undergraduate with experience in Software Development, AI/ML Applications, Automation Tools, and Full-Stack Web Development. Skilled in Python, JavaScript, React, Flask, Machine Learning, REST APIs, and DevOps practices. Passionate about building scalable applications, AI-powered solutions, and innovative user-focused products.

Education

GLA University, Mathura

2023 – 2027

Bachelor of Technology (B.Tech) in Computer Science Engineering

Technical Skills

Programming Languages: Python, C++, Java, JavaScript

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Flask, REST APIs

Database: MongoDB, SQL

AI/ML: PyTorch, Machine Learning, Deepfake Detection

DevOps & Tools: Git, GitHub, Docker, Kubernetes, CI/CD

Concepts: Data Structures & Algorithms, DBMS, OOP, Authentication, Deployment, Agile Methodology

Projects

DEEPSEEK-AI — Python, Flask, PyTorch, Chrome Extension

GitHub

- Developed an AI-powered media verification platform for detecting manipulated digital content.
- Implemented real-time AI-generated image detection using machine learning models.
- Built deepfake audio detection and news authenticity verification features.
- Integrated a Chrome Extension with a floating screenshot button for instant verification.
- Designed browser-based workflows enabling one-click analysis and validation.

EXWHYZED Typer Pro — Python, Tkinter, PyAutoGUI

GitHub

- Built a desktop automation tool capable of automatically typing user-provided content.
- Developed an intuitive Tkinter-based graphical user interface.
- Utilized PyAutoGUI for reliable keyboard automation and interaction.
- Enabled cross-device operation through remote desktop applications such as AnyDesk and TeamViewer.
- Focused on productivity enhancement and workflow automation.

AryanOS Portfolio — Next.js 15, TypeScript, React, Tailwind CSS

GitHub

- Designed a unique operating-system-inspired portfolio website.
- Implemented boot animations, taskbar management, and application docking systems.
- Built draggable and resizable windows using React-Rnd.
- Developed interactive applications including Terminal, File Explorer, and Snake Game.
- Added customizable wallpapers and responsive user experience across devices.

Training & Experience

JOVAC – Technical Guftgu, GLA University

- Worked with Git and GitHub for version control and collaborative development.
- Implemented CI/CD concepts and deployment workflows.
- Deployed applications using Docker containers and Kubernetes.
- Built and tested REST APIs while integrating frontend and backend services.
- Gained practical exposure to monitoring, troubleshooting, and application deployment.

Certifications

- Microsoft Learn – Generative AI Fundamentals
- Agile Methodology Certification – Master of Project Academy
- JOVAC Technical Training Program

Achievements

- Solved Data Structures and Algorithms problems on LeetCode.
- Developed multiple open-source software and AI-based projects.
- Actively participated in coding competitions and technical events.
- Strong interest in AI, Machine Learning, Automation, and Software Engineering.
